

LED₁

IN OUR OPINION, THE BEST LAMP IN THE WORLD.

Our new innovation, the ground-breaking LED₁ lamp combines modern technology, wood and simple design language. LED₁ is really all about the Tunto design philosophy: the hidden touch-sensitive switch gives you a true feel of the material and finishing of this unique lamp.

For those who appreciate timeless design, functionality and quality in a lamp, LED₁ is the perfect choice. The woods have been carefully chosen by Tunto designers from the best materials. LED₁ is available in various types of wood (oak, walnut and birch) and comes in eleven Tunto colours. Special attention is paid to the materials and assembly of the electronics and the individual LED lights in the lamp.

LED₁ is the perfect desk lamp: it emits a soft, indirect and efficient light that's perfect for lighting your work environment, all the while using little electricity (15 W) and producing a lighting level of 1200 lux, equaling a regular 60 W light bulb.

LED₁ won the prestigious international red dot Best of the best award in product design in 2009. It has been designed by Tunto founder Mikko Kärkkäinen.

Size: 370 x 300 x 170 mm.
